

Table of Contents

Christofides' Algorithm for s-t Traveling Salesman Problem in Grid Networks

Abdolhosseinzadeh, Mohsen; Djahangiri, Mehdi.....

A Combined Scalarizing Method in Multiobjective Problems

Akbari, Fereshteh; Khorram, Esmale

Numerical Solution for Nonhomogeneous Differential Equation with Variable Delays

Akhavan Ghassabzadeh, Fahimeh; Soradi-Zeid, Samaneh.....

Multi-objective Programming model to design a sustainable Food Supply Chain Considering Dietary Factors

Alizadeh, Mahsa; Javadian, Nikbakhsh.....

An Adaptive Descent Extension of the Polak-Rebière-Polyak Conjugate Gradient Method Based on the Concept of Maximum Magnification

Aminifard, Zohre and Babaie-Kafaki, Saman

A DEA model under correlated polyhedral uncertainty sets

Arabmaldar, Aliasghar; Hatami-Marbini, Adel.....

Modeling and Simulation of Urban Traffic Network Using Enterprise Dynamics (Case study: the Sabzeh Meydan intersection in Qazvin city)

Arjmand, Masoud; Ebrahimzadeh, Majid; Barzegar, Salman

A Heuristic Nonlinear Penalty Model for Linear Regression

Babaie-Kafaki, Saman; Roozbeh, Mahdi; Manavi, Monireh

Scheduling a Multiproduct Pipeline Problem Under Flow Rate Disruption and Uncertainty by Sample Average Approximation Solution Approach

Beheshti Asl, Neda; Mirhassani, Seyed Ali.....

hoosing the Technology in Closed-Loop Build-to-Order Supply Chain

Ebrahimi, Malihe.....

Analysis of Supply Chain Efficiency under VaR and C-VaR Risk Preferences

Fallah, Mohsen; Mashreghi, Hamid; Emami, Saeed.....

Fuzzy Superiority and Inferiority Ranking Method in Multi Criteria Decision Making: Supplier Selection Problem

Fazlollahtabar, Hamed

Evaluating the Congestion Effect in the Two-Stage Structures by NDEA Models

GholamAzad, Maedeh; Pourmahmoud, Jafar.....

Proposed A Novel Hybrid Meta-Heuristic Algorithm Based on GA, KA and RDA for Solving Integrated Mathematical Model of Cell Formation with Machine Layout and Cell Layout in a Dynamic Environment

Golmohammadi, Amir-Mohammad; Tavakkoli-Moghaddam, Reza; Balajeh, Negar; Meraji, Soha.....

An Inner Estimation of the Minimal United Solution Set of INARE in Transport Theory via a Sensitivity Analysis Technique

Haqiri, Tayyeb.....

A Method for Solve the Time Delay Optimal Control Problems

Hedayati, Mehrnoosh; Ahsani Tehrani, Hojjat.....

A Sustainable Blood Supply Chain Model Considering Disruption Using Multi-Objective Fuzzy Programming

Hoseini, Marjan and Javadian, Nikbakhsh.....

A Method for Solving Linear Programming Problem with Intuitionistic Fuzzy Parameters

Hosseinzadeh, Elham; Beigi, Sakine.....

On the Uzawa Accelerated Over-Relaxation Iterative Method for the Elliptic PDE-Constrained Optimization Problems

Izadkhah, Mohammad Mahdi.....

Centralized Resource and Revenue Allocation with Flexible Measures: A DEA-Based Approach

Jahani Sayyad Noveiri, Monireh; Kordrostami, Sohrab.....

An Extension on Bit Torrent Protocol Using Game Theory

Jamshidi-Nejad, Sepideh; Bayat, Peyman; Vaez-Ghasemi, Mohsen.....

Modeling and Solving a Multi-objective Supplier Selection and Quota Allocation Problem under Disruption

Javadi Gargari, Farnaz; Amoozad-Khalili, Hossein; Tavakkoli-Mogaddam, Reza.....

Optimality Conditions for Nonsmooth Quasi-Convex Optimization Problems Using ϵ -Upper Regular Convexifiers

Kabgani, Alireza.....

An Approach to Multi-Attribute Group Decision Making Based on Choquet Integral and Fuzzy TOPSIS

Keikha, Abazar; Mishmast Nehi, Hassan

Evaluation and Ranking of Petrochemical Suppliers by SWARA-WASPAS Techniques (A Case Study: PAPCO)

Kiani, Mona; Hajiaghaei-Keshteli, Mostafa; Fazli, Masoud

A Effective Parameter for Dai–Liao Family of Conjugate Gradient Methods Based on Modified Secant Equation

Lotfi, Mina; Hosseini, S.Mohammad

A GRASP Algorithm for Pickup and Delivery Problem with Time Windows in Vessel Routing Problem

Mardanpour Shahrekordi, Shirin; Ziarati, Koorush.....

A Inventory-Location Model for Multi-Period Pharmaceutical Supply Chain Network Design

Mohammadzade, Pardis; Javadian, Nikbakhsh.....

Multi-Objective Approach for U-Shaped Robotic Mixed-Model Assembly Line Balancing with Robot Failures

Mohammadzade, Saeed; Tavakkoli-Moghaddam, Reza; Khezri, Amir-Hossein.....

Multi-Objective Robust Optimization Approach for Green Routing Problem Considering Load-Dependent Time Window and Service Time

Mokhtari, Seyyed Mobin; Javadian, Nikbakhsh.....

Bipolar Fuzzy Relation Programming Problem with a Geometric Objective Function

Molai, Ali Abbasi.....

On the Penalty Parameter in the Augmented Lagrangian Relaxation of the Uncapacitated Facility Location Problem

Monabbati, Sayyed Ehsan.....

An Inventory-Routing Problem for Deteriorating Products in a Closed Loop Supply Chain

Moubed, Mitra

Design and Optimization Sustainable Resiliency for Waste Network

Negarandeh, Rana; Tajdin, Ali.....

A Method for Solving Fuzzy Flexible Goal Programming Problems by Use of MINMAX Approach

Nasseri, Seyed Hadi; Mahmoudi, Faranak

Integrating Resilience Supply Chain Network Design and Scheduling Problems Applying the Robust Optimization Approach

Nayeri, Sina; Heydari, Jafar; Sazvar, Zeinab

VRP and Maintenance Scheduling Integration for Heterogeneous Assets with Soft and Hard Time Windows

Nikoubin, Alireza; Ghasemi, Mohammadreza; Rabbani, Masoud.....

A Humanitarian Logistics Model Considering Network Failure and Standard Relief Time with Split-Delivery

Pahlevani, Mahsa; Amini, Maryam.....

Simulation Based Multiple Disturbance Evaluation in a Green Closed-Loop Supply Chain

Pourmehdi, Mohammad; Emami, Saeed.....

Optimizing a Sustainable Battery Closed-Loop Supply Chain

Pourmehdi, Mohammad; Paydar, Mohammad Mahdi; Asadi-Gangraj, Ebrahim.....

A New Approach for Eigenvalue Assignment via Uncertain State Feedback Controllers

Ramroodi, Nasim; Ahsani Tehrani, Hojjat

The Use of Linear Time Series for Prediction of Congestion Detection in Wireless Sensor Networks

Rezaei, Atieh.....

An Improved Trust Region Method for Unconstrained Optimization

Saeidian, Zeinab.....

A Nonmonotone Adaptive Method for Solving the Unconstrained Optimization Problems

Saeidian, Zeinab.....

A Problem Based on the Cost of the Location Allocation Problem and Data Envelopment Analysis

Sayyar, Tahereh; Fathaii, Jafar; Ghiyasi, Mojtaba.....

A Bi-Objective Sustainable Waste Collection Problem with Heterogeneous Fleet and Fuzzy Parameters

Sayyari, Mohammad Reza; Khabbazi, Amir Hosein; Torabi, Seyed Ali.....

A Resilient Green Meat Supply Chain Network Design; Applying Multi-Objective Robust Optimization Approach

Sazvar, Zeinab; Ebrahimkhani, Sara; Izadi, Atie.....

Robust Centdian Problem on Tree Networks with Interval Edge Lengths and Vertex Weights

Seyyedi Ghomi, Soudabeh; Baroughi, Fahimeh.....

A Heuristic Method to Solve an Energy-Efficient Unrelated Parallel Machines Scheduling Problem With Learning Effect and Deteriorating Jobs

Sheikhalishahi, Mohammad; Nayeri, Sina

Dynamic Pricing and Inventory Control for a Perishable Product under Network Externality

Vahdani, M; Sazvar, Zeinab

Error Bounds for Absolute Value Equations

Zamani, Moslem; Hladic, Milan.....

The Position of Multiobjective Programming Methods in Fuzzy Data Envelopment Analysis

Zamani, P.; Shafiei Zadeh, M. M.....

The Extended Two-Type Parameter Estimator in Linear Regression Model

Zeinal, Amir
